1	Ghalia Aamer	F	Talk Maze	Training Institute (Communcation Skills)	Service	In 2020, TalkMaze was founded with a vision for a world where communication skills training is accessible to every student around the globe. The platform aims to empower young people globally through communication skills training. Today, TalkMaze offers virtual public speaking and debate programs, 1:1 coaching, and partners with several schools to provide tools to improve communication skills and boost confidence. Thousands of students across the globe have benefited from TalkMaze's programs and support. As the founder and CEO of TalkMaze, Ghalia travels around the world to advocate for expanding access to communication skills training, with a mission to continue growing TalkMaze's reach and bringing communication skills to even more students worldwide.
2	Reza Enaloui		Semi Technic	Power Semiconductor devices and systems	Mfg	<p>SemiTechnic is aiming to become a leader in providing power semiconductor devices and systems in Canada providing essential components of power systems in various industries such as oil & gas, petrochemicals, healthcare, agriculture, construction, maritime, telecommunications, etc.</p> <p>The demand for electricity has prompted the utilization of numerous renewable energy sources, large-scale storage technologies, diesel generators, and natural gas generators to create local grids called microgrids. Depending on the size and infrastructure of the microgrid, it can either power a small community on its own or connect to the utility grid and distribute power to a large area. When consumers have access to more than one power source, it is important that power sources are transitioned seamlessly to ensure reliable, uninterrupted power.</p> <p>Fluctuations, sags, surges, or other disruptions will adversely affect the normal operation of the connected units, causing damage to the equipment and resulting in financial loss. The power semiconductor devices are essential in</p>

						<p>facilitating the seamless transition between power sources as well as the operation of power systems in general. They are widely used in electrical generation, transmission, and distribution systems and have reduced electrical losses while reducing the cost and size of the power systems significantly.</p> <p>The microgrid market is growing rapidly, with an estimated \$42.3 billion market based on MarketsandMarkets™. At SemiTechnic, we provide our clients with a range of engineering, design, installation, and maintenance services. In the past few years, we've partnered with many OEMs and technology companies to complete numerous large-scale and small-scale projects.</p>

4	Chad Midnight		Aquaduct Water Systems	Water delivery system	Mfg	<p>The Aqueduct is a gravity-fed water delivery system that allows a large volume of potable drinking water to be conveniently transported, stored, and dispensed, within a relatively small footprint. Not only is it important for all of humanity to have clean drinking water, but we must also place equal value on the importance of convenience, and availability, of drinking water.</p> <p>The Aqueduct water system can provide these benefits in a number of scenarios including, but not limited to, dining establishments, large-scale special events, remote industrial or military sites, communities affected by natural disasters, and even in developing areas where clean water is scarce.</p>

29	Tarila Morrone_		Heart of Games	Activities and games for children/Mental well-being	Service	<p>One mom on a mission to help improve the lives of children everywhere. Hearts of Gems is born from my experience as a busy mom of two little girls who, like so many other children, have some really big emotions. I sometimes found myself searching for answers to questions I had about handling everyday situations, but with all of the information that's available, I actually found it completely overwhelming. I wanted to spend less time searching and more time being fully present and intentional so each of my girls feels confident, has a sense of calm and emotional well-being they need to thrive. Frustrated with the lack of easy options that fit into my life, I decided to create simple solutions for myself. And with more connection came more regulated and happy kids. Hearts of Gems is here to help busy parents (like us) find simple ways to support their children's development and love for self. We understand the importance of these early years in creating a strong foundation for our children; one filled with more listening, more connection, more understanding and more joy. Hearts of Gems offers thoughtfully, joyfully and simply designed affirmations, activities and games the whole family will enjoy. By enriching children's mental well-being, each of us can positively shape the way a child sees and treats themselves and others.</p> <p>Through this, we believe we can start to change the world, one child at a time; sprinkling goodness wherever life takes them and making the world a little brighter.</p> <p>Thoughtfully, joyfully and simply designed, our products make it easy for parents to support their child's mental and emotional well-being. From our Conversation Cards to Lunch Box Notes, our products seamlessly fit into everyday moments, helping you connect with your child to build a healthy sense of self, foster kindness, confidence, and gratitude. Together, we can improve the lives of children everywhere.</p>

32	Sean Ryan		Predicting Alpha	Data and information	Service	<p>We started Predicting Alpha because the gap between retail traders and Wall St is so big that no amount of time, smarts, or effort can bridge it. Someone needed to step in and provide easy access to the data, and the education to put it to work.</p> <p>Having spent 3 years learning and finally bridging that gap for ourselves, we felt compelled to create the same opportunity for others.</p>

						<p>That’s why our mission is to democratize access to tradable information for everyone. Because every trader who works hard deserves their fair chance at success.</p> <p>We started in January 2020 and have worked every day since then to create the ultimate trading experience. Within our small team we have created over 150 hours of education, an option terminal that even professionals prefer, and a community of over 200 traders who have stopped gambling and built a real business around their trading.</p> <p>Our mission is to help 100,000 traders find an edge and make the resources needed to succeed available to everyone.</p>
33	Diana Virgovicova and Kerem Topal Ismail Oglou		The Dressing Room TDR	Digital Store front	Service	<p>Our Cadence-backed checkout system creates a more interactive and eco-friendly environment for buyers purchasing products from online SMEs and authentic brands. Services- Digital storefront</p> <p>We create a digital storefront for your brand. We turn your products into their digital counterparts, which are NFTs of 3D-rendered product models—this transition leads to secondary marketplace resales and, eventually, an additional revenue stream for your brand. Digital Product Passport. Anytime Express Shipping</p> <p>We partnered with DHL express and other global logistics leaders to ensure that all products from your brand are securely and quickly delivered to the customers. We deliver directly from your hands to the hands of customers across the globe.</p> <p>Our optional service is a digital product passport, a QR code holding information about your brand, the material used, and the carbon footprint. The QR code is attached to every item of your brand. We provide this service for brands that want to approach their customers most sustainably.</p>
