

Industrial Dreams Take Shape: Amit's Journey from Job Seeker to JCB Supplier

Founder, Balaji Enterprises | Haryana

Mr. Amit, a determined and self-driven entrepreneur from Faridabad, Haryana, transformed his passion for mechanical work into a thriving business. Coming from a modest family of seven—his father employed at Auto Tech Engineers, a reputed name in the automotive sector—Mr. Amit's journey is rooted in perseverance and a desire to build something of his own. After completing his 12th standard in 2014 and pursuing a Bachelor of Arts (which he discontinued in the

final year), Mr. Amit gained hands-on experience in the mechanical field. Though he worked various jobs, he found little satisfaction in employment and was drawn toward entrepreneurship. In 2021, he founded **Balaji Enterprises**, a manufacturing unit focused on producing industrial **bushes**, with an initial investment of ₹5 lakhs. A turning point came in his journey when he connected with the **Bharatiya Yuva Shakti Trust (BYST)**. With their mentorship and support, Amit secured a ₹1.9 lakh loan from the **State Bank of India**, which enabled him to upgrade machinery, increase production capacity, and strengthen market outreach. What began as job work for three local vendors has grown steadily. Today, Balaji Enterprises counts JCB India among its prestigious clients—a testament to Mr. Amit's quality-focused approach and unwavering commitment. His story is a compelling example of how vision, resilience, and the right support can transform grassroots ambitions into meaningful enterprise. Mr. Amit continues to scale his operations while contributing to India's vibrant manufacturing ecosystem.

Name of the Entrepreneur:	Mr. Amit
Business Name:	M/S Balaji Enterprises
Nature of the Business:	Manufacturing Of Metal Parts (Bushes)
Type of Business:	Manufacturing
Loan:	1.9 lakhs
Bank:	State Bank of India
Year of Disbursement	2023
Email ID	amitkumar3yadav@gmail.com
Donor:	Cisco
Turnover:	12 lakhs
Employment:	3
Mentor:	Mr. Avtar Krishan Gaur
Mentor Occupation:	Industrialist

Precision Components

Balaji Enterprises manufactures a wide range of precision components for automotive and heavy machinery applications, including parts for JCB and Maruti Suzuki. Their product line includes various types of hinge bushes, clutch nuts, and clutch pins—each designed in multiple sizes and specifications to ensure optimal fit and performance. The hinge bushes reduce friction in moving joints, while the clutch nuts and pins support smooth clutch operation. They also produce forged and machined yoke rods with threaded tops and forked ends for use in automotive linkages and construction equipment. Additionally, they offer high-grade dowel pins (industrial drive pins) made from alloy steel, designed for accurate alignment and secure fastening in mechanical assemblies.
