

## Rohit Diwan – Precision, Passion, and the Pursuit of Manufacturing Excellence

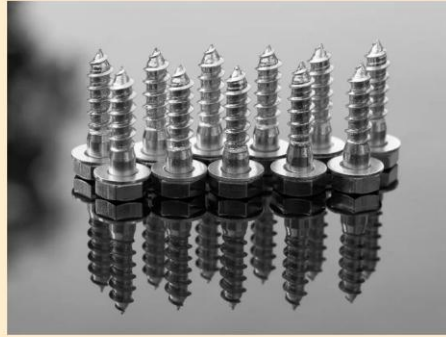

*Founder, Screw Manufacturing Unit | Maharashtra*

Rohit Diwan, a spirited 29-year-old entrepreneur from Shiroli Malwadi in Kolhapur, turned early professional exposure into a blueprint for his own industrial success. After completing his formal education, Rohit joined M/s Shree Balaji Sales, where he gained hands-on experience in the hardware and industrial components sector. His time there shaped his understanding of customer needs, market dynamics, and supply chains—ultimately sparking his ambition to start a screw manufacturing enterprise of his own. In March 2024, Rohit connected with BYST

through the Kotak Mahindra Bank Ltd.–Kolhapur Cluster, marking the beginning of a focused and strategic entrepreneurial journey. With the guidance and mentorship from the BYST ecosystem, and the trust he built with Bank of Baroda, Rohit successfully secured financial assistance comprising a ₹16.75 lakh term loan and a ₹6.99 lakh cash credit facility. By December 20, 2024, his vision began to take tangible shape as the funds were disbursed and his unit became operational. Today, his screw manufacturing business is up and running with a team of four skilled employees. Known for its quality, precision, and timely delivery, the unit is gradually making its mark in the regional industrial components market. Rohit is now planning to scale operations and diversify into complementary product lines, demonstrating both foresight and ambition. Rohit Diwan's journey reflects the power of structured mentorship, financial empowerment, and grassroots determination. From employee to employer, his transition highlights the critical role that ecosystem enablers like BYST and institutional partners play in turning entrepreneurial dreams into high-impact enterprises.
